Professional Communication

- **English for IT 1**
Cisco *(Nov 2024)*
- **English for IT 2**
Cisco *(Nov 2024)*

RESEARCH INVOLVEMENT:

ExcelLens: A Digital System for Student Performance and Course Analytics

Capstone Project Presented to Bachelor of Science in Information Technology
2025

PROJECTS:

Python

Shop Inventory Management System (2023)

A stand-alone application that allows users to add, update, and delete inventory items, with automated stock adjustments for item additions and sales.

Barangay Information Management System (2024)

A stand-alone system for managing barangay resident records and generating official barangay documents directly from individual resident profiles.

Dormitory Information Management System (2024)

A stand-alone application for managing dormitory occupants, including tracking rent payments, electricity, and water bills.

Coastal Clean-up Count Tracker (2024)

A stand-alone system that logs collected waste during coastal clean-up activities and estimates total bag weight using predefined weight assumptions per item type.

Student Enrollment Management System (2024)

A stand-alone application that evaluates student eligibility for course enrollment by validating curriculum prerequisites and requisites. The system also provides a comprehensive grade overview per course.

PHP

Hospital Information Management System (2024)

A web-based centralized hospital system that manages appointment scheduling, patient records, assigned doctors and nurses, and medical equipment and medicine inventories.

BPO Information Management System (2024)

A web-based system designed to track sales performance, employee records, violations, and team progress within a BPO company.

Online Banking System (Demo) (2025)

A demonstration web application that simulates core banking operations, including fund transfers between accounts and an administrative dashboard for monitoring user activity trends.

ExcelLens: Student Performance and Course Analytics System (2025)

A web-based centralized academic analytics platform that embeds the university curricula for faculty course loading, automates grading through configurable assessment criteria, and generates Excel reports for student grade validation.
